

KHUWAISH GOYAL

Software Development Engineer Backend

+91 7056109429 goykhuwaish667@gmail.com  KhuwaishGoyal  KhuwaishGoyal28

SUMMARY

Aspiring Software Development Engineer (Backend) with internship experience in Python, Firebase, and cloud integration. Proficient in backend development, building RESTful APIs, managing databases, and deploying scalable web applications. Passionate about solving real-world problems through efficient code, data structures, and clean architecture.

SKILL

- Languages: Python, SQL, Java (basic)
- Databases: MySQL, SQLite, SQL Server, Firebase, MongoDB (basic)
- Data Processing: Pandas, NumPy, ETL pipelines
- Visualization Tools: Tableau, Seaborn, Matplotlib, Power BI
- Cloud Platforms: Firebase (hands-on), AWS (basic)
- Version Control: Git
- Operating Systems: Linux (basic operations)

CERTIFICATIONS

- Data Analytics and Visualization (accenture)
- Introduction to Tableau
- FDP
- Inferential Statistics
- Introduction to AWS
- Introduction to Firebase
- Google Skill Badges

EDUCATION

Bachelor of Technology – Data Science

Jain Deemed-to-be University
2022 – 2026 (Pursuing)

12th Grade—Non-Medical

Sawan Public School
2020 – 2022

10th Grade

St. Xavier Frances School
2020

LANGUAGE

Hindi
English

EXPERIENCE

Feb 2025–March 2025
Moticonut Internship

Feb 2025–April 2025
Codespeedy Internship

Jan 2025–April 2025
Uptoskill Internship

Python Developer Intern

- Created utilities such as username generators and expenditure calculators.
- Applied core Python concepts to automate basic processes.

Data Science Intern

- Published Python-based tutorials and solutions focused on beginner to intermediate-level data science tasks.
- Contributed to educational content addressing real-world business problems.

Android Developer

- Developed a real-time leave application tracking system using Firebase Cloud.
- Built a receipt generation module for dynamic record keeping.
- Collaborated with a team to integrate cloud-based backends with frontend tools.

HACKTHON & PROJECT

- Code Relay
- Fraud Detection System
- Honeywell Hackathon
- DATABASE CONNECTION With Tableau and power BI
- Rapid Innovation Challenge
- TECHNOVATE FOR INDIA
- CODEWEAVE 3.0 SIH
- TCS Techbytes
- Microsoft Azure AI Challenge
- Tableau & Data Visualization
- Workshop IBM Enterprise Data Science Workshop
- TATA Imagination Challenge
- IEEE SSH Runner-up
- NASA Space Apps Challenge

- Projects using Power BI:
Analytical Dashboard for HR
DASHBOARD FOR SUPERMARKET SALES
Analysis Dashboard for SHARK TIME
SALES DASHBOARD FOR AMAZON
 - Projects for Tableau:
The sales dashboard for the bookstore
An analysis of Indian crop production
- Python-based projects:
The prediction and recommendation of a student's career path
PREDICTION OF NATURAL DISASTERS
 - Android app:
KHATE KA GURU (manage all Indian farmer data using a database)
FitFORCE is a medical app that allows working professionals to monitor their health and has a multilingual chatbot feature.
Leave request (firebase cloud)

AWARDS

- HoneyWell Hackathon, 8th place for shortest path and dynamic evacuation of occupants in a building (using simulation tool) at the Jain University
- IBM, Getting Started with Enterprise Data Science
- Rakuten Hackathon, ABEA (AI BASED personalized E-Commerce application), Finalist
- IEEE (Sustainable Solution for Humanity 2024) got the 1ST prize in development of farmers app
- IEEE (Rapid Innovation Challenge), 1st place for empowering poor communities and groups by engaging educational and employment facilities within an integrated app
- 1st position in Code Relay at Jain University for fraud detection system and shortest path algorithm
