Summary

Computer Science and Engineering - Data Science student at Jain University proficient in data visualization, Android Studio, and Firebase. Experienced in developing mobile applications with real-time data and cloud integration. Adept at analyzing data and presenting actionable insights through clear visualizations. Eager to apply technical skills to develop innovative solutions.

Awards & Recognition

- * 1st Place, IEEE Rapid Innovation Challenge 2024: Developed an integrated app for education and job access.
- * 1st Prize, IEEE Farmers App Development: Created an AI-driven mobile app for sustainable agriculture.
- * 1st Position, Code Relay, Jain University: Designed a fraud detection system using shortest-path algorithms.
- * Top Team, Salesforce Study Jam 2024: Awarded for innovative wellness app (Fitforce).

Technical Skills

AI & ML:	Pandas, NumPy, Scikit-learn, Seaborn, Matplotlib, TensorFlow (basics), Hugging Face Pipelines, NLP, LSTM
Visualization:	Power BI, Tableau
Languages:	Python, SQL, Java
Databases:	MySQL, SQLite, SQL Server, MongoDB (basic)
Tools:	Git, GitHub, Android Studio, VS Code, Firebase, Gemini API Problem-Solving,
Soft Skills:	Teamwork, Communication, Leadership, Adaptability

Projects

- Luxury Brand Fraud Detection** (jan2025 - april2025) *Computer Vision, CNN, Python*
- Developed a CNN + Faster R-CNN object detection model integrated with OCR to identify counterfeit luxury products.
 - Streamlined and enhanced the product authentication process by enabling automated, real-time verification using mobile feeds.
- Natural Disaster Prediction** (oct2024 - dec2024) *Machine Learning, Python*
- Developed machine learning models utilizing weather and seismic data to predict disaster probability and severity, enhancing forecasting accuracy.
 - Enabled data-driven decision-making for governmental bodies and non-governmental organizations in disaster preparedness and risk mitigation through the provision of actionable insights and predictive analytics.
- Indian Crop Production Analysis** (sep2024 - march2025) *Tableau, Visualization*
- Analyzed multi-year crop yield data across states, uncovering agricultural patterns and productivity trends.
 - Created dashboards aiding policymakers in resource allocation and agricultural planning.

Experience

- Data Science Intern – Codespeedy** Feb2025 – Apr2025
- Authored Python tutorials on data science and ML workflows, simplifying complex concepts.
 - Focused on real-world problems, bridging theory with practical implementation.
- AI Developer Intern – Zidio Developer** May 2025 – Aug 2025
- Built generative AI apps using Hugging Face pipelines for image creation and GIF synthesis.
 - Developed a multimodal chatbot integrating Google Gemini API for text + voice interactions.
 - Enhanced AI-driven user experiences by deploying models with efficient pipelines and cloud integration.

Education

- Bachelor of Technology – Data Science**
Jain Deemed-to-be University (2022–2026) (Pursuing)
- 12th Grade—Non-Medical**
Sawan Public School (2020–2022)
- 10th Grade**
St. Xavier Frances School (2020)
